

## Pannellum 360° Viewer Easy Guide (Hindi Style)

### 1. Apni 360 photo ko rename karo:

- Photo ka naam hamesha "panorama.jpg" rakho.
- Agar .jpg nahi hai to convert karke .jpg banao.

### 2. HTML file banane ka tareeqa:

- Ek new text file banao.
- Isme woh code paste karo jo maine diya tha.
- File ko "index.html" naam se save karo.

### 3. File ko sahi jagah rakho:

- Same folder me do cheeze honi chahiye:

A) index.html

B) panorama.jpg

- Dono ek hi folder me hone chahiye tabhi 360 viewer chalega.

### 4. Kaise open karna hai:

- Sirf index.html open karo.
- 360 photo full rotate ho jayegi.

### 5. Dusre product ka 360 banana:

- Bas nai product ki photo ka naam phir se "panorama.jpg" rakho.
- Purani photo replace ho jayegi.
- HTML file me kuch bhi change nahi karna.

### 6. Permanent link kaise milega:

- Agar permanently online rakhna hai to Google Drive / Netlify / GitHub Pages par upload karo.
- Jisko share karoge, sab ke phone me 360 me chalega.

Bas itna hi simple process hai!
